

Alliance for Green Socialism

The **Alliance for Green Socialism** is a political organisation devoted to the building of a peaceful, environmentally safe and socially responsible world. A world in which diversity is both respected and celebrated. A world in which relations are based on mutual understanding and not force, where rights and a decent life are available for all, not just the rich. The AGS believes this can come about by the development of a democratic, socialist and environmentally conscious society. Our two basic principles are summed up in our name.

Green is for a world where the serious issues of pollution and global warming are properly dealt with. This means tackling the oil-driven system of big business, which drives us into successive wars and conflicts.

Socialism is the opposite of such a system in which the needs of the people take priority and the power of big business is curbed. A key element in this being an expansion of various forms of public ownership, from taking the railways back into the state sector to an expansion of cooperatives.

Linking these two indivisible themes is a commitment to openness and democracy.
