

Eco-Villages

The name makes them sound new and revolutionary, part of a new movement toward sustainability and community. But in reality, this is the way humans have lived for thousands of years before we took a sharp turn toward unsustainable living. Eco-villages are glimpses to the past, to how humankind used to resonate with the natural environment. They are spreading and popping up everywhere where people are found.

Here is an alphabetical list of ecovillages from the Fellowship for Intentional Community (FIC) website.

1. 5th dimensional eco-village (northern NM or southern CO, New Mexico, United States) Forming
